(a)
Family-wise $p < 0.05$ (max-T)
Not family-wise significant
95% block-bootstrap CI (2021–2025)
Shifted-wind null, 95th percentile
Pair statistic D_{ij} (dimensionless)
Station separation (km)
(b)
Pair statistic D_{ij} (dimensionless)
Station separation (km)
(c)
Number of shifted-wind surrogates
Observed
$D = 0.2879$
Pooled statistic D (dimensionless)
(d)
2021–2025 (bar: range over years)
2026
Development simulated reference range
Centroid = transit time
Positive-part lag centroid (h)
0–0.5
0.5–1
1–1.5
1.5–2
2–3
Nominal transit-time class (h)
